DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 67, ~~29~~⁶, and 70 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 62 of copending Application No. 10/462,936.

Claim 62 of the copending application claims a device comprising a radiation detector having a field of view in combination with a laser sighting system comprising a laser and a beam splitter that emits more than two divergent laser beams. The more than two divergent beams are displayed as visible light spots that are mutually divergent (spaced apart) onto a target surface to visibly indicate the field of view of the detector.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 67, 69, and 70 are rejected under 35 U.S.C. 102(a) as being anticipated by German Patent 19528590 to Schmidt.

Schmidt discloses a temperature measuring device comprising:

an IR radiation detector having a field of view in combination with a laser sighting system what includes a laser and a beam splitter illuminated by the laser and emitting more than two divergent laser beams split from the single beam and projected onto a measurement area to form a pattern of visible spots mutually spaced apart to indicate to the user the field of view of the detector.

Response to Arguments

5. Applicant's arguments that the rejection of claims 67, 69, and 70 over Schmidt is improper are not persuasive. Applicant states that the subject matter of claim 67, 69, and 70 is based on figure 10 of U.S. Patent 5,823,678 filed on 12/11/1996, which disqualifies the Schmidt reference as prior art since Schmidt has a publication date of 2/6/1997. However, these arguments are not persuasive since claims 67, 69, and 70 claim a 'beam splitter' splitting the beam, which is not part of the embodiment shown in figure 10 of U.S. Patent 5,823,678 since this embodiment uses optic fibers or a diffraction element. Furthermore, claims 67, 69, and 70 claim more than two mutually divergent visible laser beams that identify "the field of view",

Art Unit: 2859

which has been interpreted by the examiner to mean that the field of view can be identified by more than one pattern as introduced in U.S. Patent 5,823,679 filed on 4/28/1997 and after the publication date of Schmidt, wherein U.S. Patent 5,823,679 introduces forming two patterns used simultaneously for identifying "the field of view".

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
